DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, regarding the limitation "each said first insulating layer and each said second insulating layer are of a non-porous body material", nowhere in Applicant's originally filed disclosure is there even a mention, explicit or implied, that the insulating layers are to be comprised of a non-porous material. Thus, the ordinarily skilled artisan would not readily see that Applicant was in possession of the instantly claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,274,821 B1 (Echigo).

Echigo discloses, referring primarily to figure 1, a multilayer circuit board, comprising; a plurality of cable layers (L1r, L2r), each of which includes electric conductive sections (6); a plurality of first insulating layers (L1r, L2r), each of which encloses said electric conductive sections in each cable layer and fills spaces between said electric conductive sections, each of said electric conductive sections of each of said cable layers including a cable pattern (6) and a land pad (11); post vias (7) electrically connecting said electric conductive sections in one cable layer to those in another cable layer, wherein height of said electric conductive sections in each cable layer are equal to that of said first insulating layer enclosing said electric conductive sections; and a second insulating layer (L1i), which is formed to enclosed said post vias, wherein height of said post vias equal to that of said second insulating layer and each said first insulating layer and each said second insulating layer are of a non-porous body material (col. 4, lines 1-25 and 40-55) [claim 1].

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 10/612,990

Art Unit: 2841

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy C. Norris whose telephone number is 571-272-1932. The examiner can normally be reached on Monday - Friday, 9:30 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
